A Smarter Way to Learn **HTML and CSS** / Chapter 5

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20

20. Now I'll ask you to link the same HTML code to the CSS file named "styles2.css". The file is in the same directory as the HTML code, so you don't need to specify a subdirectory. This CSS file specifies new fonts for the heading and the paragraph and specifies red for the heading color. You'll learn to create these styles soon. Write your link code in the space I've left for you. Don't change any of my code. When you're finished, click **Run it.**
